5. Skip unused correspondence reconstruction during lowering

PR comparison pilot · 3 observations per condition · CPU 22 · 16 GiB allocator cap
Diagnostic first window: retained regression evidence; 500 s watchdog per workload process.
Arithmetic-mean whole-process time; independent Fieller 95% intervals; lower ratios mean less runtime.
Parent fb04877229a0 → this PR cecac74c2a2a; native 155b6812c334.
Multipattern: parent-to-child changes only; native multipattern omitted at user request.
Multipattern follows the paper catalog: BATAX 2nd and MTTKRP 2nd omitted; no exclusion changes.
